REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-30 are allowed.
2. The following is an examiner's statement of reasons for allowance: none of the prior discloses or suggests a method for synchronizing two data streams wherein the first data stream has a delay, the method comprising: setting a second data stream generator to output a second periodic pulse stream with its period equal to second period, T2, wherein second period, T2, is not equal in duration to first period, T1; detecting a time when a pulse of the delayed first pulse stream and a pulse of the second pulse stream occurs simultaneously, changing the period of the second pulse stream to be equal to first period, T1; a command issue unit coupled to the first and second data stream generators, the issue unit containing circuitry to issue commands to the first and second data stream generators, controlling type and period of the data streams, and a synchrony detector coupled to outputs of the first and second data stream generators, the detector containing circuitry to detect the occurrence of pulses from the first and second data stream occurring simultaneously, a combinatorial logic unit coupled to outputs of the first and second data stream generators, the logic unit containing circuitry to perform a comparison of the first and second data streams.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
